

Daniel Omodiale

Full-Stack Developer

Nicosia, Cyprus | +2347072641722 | falcdanicode@gmail.com | github.com/dyalex16 | [linkedin.com/in/daniel-omodiale-623322334](https://www.linkedin.com/in/daniel-omodiale-623322334) | <https://my-portfolio-one-kohl-8zw6uxgpkj.vercel.app/>

SUMMARY

Full-stack developer focused on real-time, data-driven web applications — matching algorithms, live communication features, and end-to-end system design. Comfortable across the stack: React/Vite on the frontend, Node/Express and PostgreSQL on the backend, with hands-on experience deploying and debugging production systems.

SKILLS

- Frontend: React, Vite, Tailwind CSS, Astro, TypeScript
- Backend: Node.js, Express, REST APIs
- Database: PostgreSQL, Prisma ORM
- Other: Git/GitHub, CI/CD (Vercel/Netlify), Render

PROJECTS

SkillSwap — *Personal Project*

- Built a full-stack skill-exchange platform which matches users to teach/learn from each other, using a custom matchmaking algorithm combining skill-overlap scoring with the Haversine formula for geographic proximity.
- Implemented real-time chat (Socket.io) and in-app video calls (Jitsi Meet) so matched users can connect without leaving the platform.
- Designed a Facebook-style match/friend-request flow, JWT authentication, and a PostgreSQL schema managed through Prisma.
- Live demo – skillswap-five-nu.vercel.app

ShareBook — *Course Project — SEN2202*

- Built a C++ console application for a second-hand book marketplace with SQLite persistence.
- Designed a multi-level OOP hierarchy (User → Customer → Buyer/Seller, User → Admin) and a Database class with overloaded query methods.
- Refactored the book catalog from a redundant pair-based storage structure to a cleaner pointer-vector design.

Portfolio Website — *Personal Project*

- Designed and deployed a personal portfolio using Astro + Tailwind CSS, deployed via CI/CD on Vercel.
- Structured project content using Astro content collections for maintainable, schema-validated project writeups.

EDUCATION

B.Sc. Software Engineering — *Bahcesehir Cyprus University,*

Expected Graduation - 2028

- Relevant coursework: Object-Oriented Programming, Data Structures & Algorithms, Software Analysis & Design.

CERTIFICATIONS

- Full Stack Open (University of Helsinki)
